

Step 1: In one sentence, write what is assessed, such as purpose or a goal.

For example, "Our goal is to get young people to exercise." / "We provide x service to target group x." / "I want to consume less."

Look through the UN Sustainable Development Goals (SDG) and choose one goal that best describes your purpose you wrote above. Also, select 1-4 SDG goals that support your chosen main SDG. (Optional: you may also select up to two SDGs at risk)

Choose one (1) main SDG and fill in the box by writing the number (or get creative and copy the illustration).

Select up to four (4) supporting SDGs and fill in the boxes.

Select up to two (2) SDGs at risk and fill in the boxes.

Step 2: Fill in the sustainable development dimension scale (economic, ecological, socio-cultural) on how your purpose or goal affects the operating environment (local, national and international). This helps to outline the level at which the sustainable development dimension is realised in terms of purpose or goal in relation to the operating environment.

	Local	National	International
Economic			
Ecological			
Socio-cultural			

You can also use different colours to represent positive, neutral, or negative effects using for example green, orange, and red. You can also refine by adding supporting words how the effect between dimensions and activity levels occurs or are visible.

Step 3: (A) Choose the most essential targets of the selected main SDG that best describes the purpose of your operations (each SDG has about 1-10 targets, select only 4). (B) Next, add the two most essential targets of the supporting SDGs. (C) Add to the peach-coloured box actions and targets how you implement your set goal or purpose **from step 1**. (D) Finally, realise a connection between A + B + C by creating a shared target interconnecting your actions with the SDG. The goal is to combine targets into one common goal.

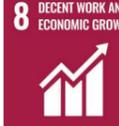

A. Most essential targets of the main SDG. You can write the target in your own words.

B. Most essential targets of the supporting SDGs.

C. What activities do you do to achieve your goal/purpose (from step 1)?

D. Create a new shared/linked target between your operations and SDG targets. The goal is to combine your own goal / purpose with the SDG target (1 + (1) + 1 = 1).

Step 4: Define concrete and implementable measures and actions how you intend to promote sustainable development in relation to the combined targets you wrote in step 3D.

New insights and ideas:

Step 1: In one sentence, write what is assessed, such as purpose or a goal.

For example, "Our goal is to get young people to exercise." / "We provide x service to target group x." / "I want to consume less."

Look through the UN Sustainable Development Goals (SDG) and choose one goal that best describes your purpose you wrote above. Also, select 1-4 SDG goals that support your chosen main SDG. (Optional: you may also select up to two SDGs at risk)

Choose one (1) main SDG and fill in the box by writing the number (or get creative and copy the illustration).

Select up to four (4) supporting SDGs and fill in the boxes.

Select up to two (2) SDGs at risk and fill in the boxes.

Step 2: Fill in the sustainable development dimension scale (economic, ecological, socio-cultural) on how your purpose or goal affects the operating environment (local, national and international). This helps to outline the level at which the sustainable development dimension is realised in terms of purpose or goal in relation to the operating environment.

	Local	National	International

Socio-cultural			

You can also use different colours to represent positive, neutral, or negative effects using for example green, orange, and red. You can also refine by adding supporting words how the effect between dimensions and activity levels occurs or are visible.

Step 3: (A) Choose the most essential targets of the selected main SDG that best describes the purpose of your operations (each SDG has about 1-10 targets, select only 4). (B) Next, add the two most essential targets of the supporting SDGs. (C) Add to the peach-coloured box actions and targets how you implement your set goal or purpose **from step 1**. (D) Finally, realise a connection between A + B + C by creating a shared target interconnecting your actions with the SDG. The goal is to combine targets into one common goal.

A. Most essential targets of the main SDG. You can write the target in your own words.

B. Most essential targets of the supporting SDGs.

C. What activities do you do to achieve your goal/purpose (from step 1)?

D. Create a new shared/linked target between your operations and SDG targets. The goal is to combine your own goal / purpose with the SDG target (1 + (1) + 1 = 1).

Step 4: Define concrete and implementable measures and actions how you intend to promote sustainable development in relation to the combined targets you wrote in step 3D.

New insights and ideas:

Step 1: In one sentence, write what is assessed, such as purpose or a goal.

For example, "Our goal is to get young people to exercise." / "We provide x service to target group x." / "I want to consume less."

Look through the UN Sustainable Development Goals (SDG) and choose one goal that best describes your purpose you wrote above. Also, select 1-4 SDG goals that support your chosen main SDG. (Optional: you may also select up to two SDGs at risk)

Choose one (1) main SDG and fill in the box by writing the number (or get creative and copy the illustration).

Select up to four (4) supporting SDGs and fill in the boxes.

Step 2: Fill in the sustainable development dimension scale (economic, ecological, socio-cultural) on how your purpose or goal affects the operating environment (local, national and international). This helps to outline the level at which the sustainable development dimension is realised in terms of purpose or goal in relation to the operating environment.

	Local	National	International

Step 4: Define concrete and implementable measures and actions how you intend to promote sustainable development in relation to the combined targets you wrote in step 3D.

New insights and ideas:

Step 1: In one sentence, write what is assessed, such as purpose or a goal.

For example, "Our goal is to get young people to exercise." / "We provide x service to target group x." / "I want to consume less."

Look through the UN Sustainable Development Goals (SDG) and choose one goal that best describes your purpose you wrote above. Also, select 1-4 SDG goals that support your chosen main SDG. (Optional: you may also select up to two SDGs at risk)

Choose one (1) main SDG and fill in the box by writing the number (or get creative and copy the illustration).

Select up to four (4) supporting SDGs and fill in the boxes.

<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

Select up to two (2) SDGs at risk and fill in the boxes.

<input type="text"/>
<input type="text"/>

Step 2: Fill in the sustainable development dimension scale (economic, ecological, socio-cultural) on how your purpose or goal affects the operating environment (local, national and international). This helps to outline the level at which the sustainable development dimension is realised in terms of purpose or goal in relation to the operating environment.

	Local	National	International
Economic	<input type="text"/>	<input type="text"/>	<input type="text"/>
Ecological	<input type="text"/>	<input type="text"/>	<input type="text"/>
Socio-cultural	<input type="text"/>	<input type="text"/>	<input type="text"/>

You can also use different colours to represent positive, neutral, or negative effects using for example green, orange, and red. You can also refine by adding supporting words how the effect between dimensions and activity levels occurs or are visible.

Step 3: (A) Choose the most essential targets of the selected main SDG that best describes the purpose of your operations (each SDG has about 1-10 targets, select only 4). (B) Next, add the two most essential targets of the supporting SDGs. (C) Add to the peach-coloured box actions and targets how you implement your set goal or purpose from step 1. (D) Finally, realise a connection between A + B + C by creating a shared target interconnecting your actions with the SDG. The goal is to combine targets into one common goal.

A. Most essential targets of the main SDG. You can write the target in your own words.

<input type="text"/>
<input type="text"/>
<input type="text"/>
<input type="text"/>

B. Most essential targets of the supporting SDGs.

<input type="text"/>
<input type="text"/>
<input type="text"/>
<input type="text"/>

C. What activities do you do to achieve your goal/purpose (from step 1)?

<input type="text"/>
<input type="text"/>
<input type="text"/>
<input type="text"/>

D. Create a new shared/linked target between your operations and SDG targets. The goal is to combine your own goal / purpose with the SDG target (1 + (1) + 1 = 1).
